

AMENDMENTS TO THE CLAIMS

Claims 1-11. (Cancelled).

Claim 12. (Currently amended) A method of manufacturing an albumin enriched fraction having a reduced prekallikrein activator (PKA) content consisting of:

(a) reconstitution of paste V (Cohn fractionation) to form a first fraction;

(b) concentrating the first fraction obtained in step (a) to obtain a concentrated fraction;

(c) addition of stabilizers to the concentrated fraction to obtain a stabilized fraction;

(d) pasteurizing the concentrated stabilized fraction obtained in step (b) (c) for a time period of at least nine hours at a temperature of 58 °C to 65 °C to obtain a pasteurized fraction;

~~(d)~~ (e) filling vials with the pasteurized fraction;

(f) performing a second pasturization with the filled vials of step (e); and

~~(e)~~ (g) incubating the vials for 10 days at 30 °C to 32 °C or for four weeks at 20 °C to 25 °C to obtain an albumin enriched fraction having a PKA content of less than 12 IU/ml.

Claim 13. (Canceled)

Claim 14. (Currently amended) The method of claim ~~16~~ 12, wherein the second pasteurization step is performed for a time period of at least nine hours at a temperature of 58 °C to 65 °C.

Claim 15. (Previously presented) The method of claim 12, wherein pasteurization is performed for a time period of at least 10 hours.

Claim 16. (Canceled)
